EDUCATION

BSc in Software Engineering
Injibara University
2023 – Present

SKILLS

Frontend
Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML / CSS, Responsive UI, i18n (Am/En)

Backend
Node.js, Express, NestJS

Databases
MySQL, PostgreSQL, Prisma

DevOps & Cloud
Git & GitHub, GitHub Actions

Tools & Design
Figma, VS Code, Postman, Design systems

STRENGTHS

- Problem solving
- Team collaboration
- Client communication
- Ownership
- Continuous learning

Biniyam Tegegne

FULL STACK DEVELOPER

PROFILE

I'm a full-stack engineer who bridges the gap between complex backend logic and effortless user experiences. I craft resilient web apps, clean APIs, and intuitive interfaces focused on real performance, maintainable code, and zero bloat.

Working across the entire stack with Next.js, React, Node.js, and modern databases, I'm at my best when taking complete ownership of a feature—from the initial architectural sketch all the way to production.

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Independent Projects)

2025 – Present

Self-Employed / Remote · Freelance / Independent Projects

Designing and building production-style full-stack web applications independently, from database schema and REST APIs to responsive interfaces, including a veterinary clinic management system, a student enrollment platform, and high-fidelity Apple and Netflix website clones.

Tools: React · Next.js · Node.js · Express · NestJS · MySQL · PostgreSQL · Prisma

SELECTED PROJECTS

Veterinary Management System

Full-stack veterinary clinic and patient management system featuring appointment scheduling, medical record tracking, and inventory management.

React · Express · MySQL · Node.js

Student Registration & Enrollment System

Scalable academic platform handling student admissions, course registration, and administrative oversight with modular architecture.

Next.js · NestJS · MySQL · TypeScript

Apple Website Clone

High-fidelity, responsive frontend clone of Apple's ecosystem replicating complex product showcases, smooth animations, and product grids.

React · Express · MySQL

Netflix Website Clone

Feature-rich media streaming UI clone featuring dynamic movie categorization, video browsing interfaces, and authenticated user state.

React · Express · MySQL
